Prime sweep from n=1k to n=38.5M
(a) Prime-counting curve
1e6
measured pi(n)
n / log(n)
Number of primes
Limit n
1e7
(b) Density versus asymptotic estimate
pi(n) / n
1 / log(n)
Prime density
Limit n
1e7
(c) Runtime growth
measured time
rolling median (101)
wall time rolling median
Time (us)
Limit n
1e7
(d) Normalized per-limit cost
cycles / n
ns / n
Cycles per limit
ns per limit
Limit n
1e7
